

# Learn All About Solar

## Upcoming Renewable Energy Workshops & Seminars

The Midwest Renewable Energy Association offers a number of introductory level seminars for home and business owners who are interested in the basics of renewable energy. The MREA also provides training for renewable energy professionals, such as solar installers and site assessors. We have a number of workshops coming up in 2010 to help make Milwaukee Shines!

### SEMINARS FOR HOME AND BUSINESS OWNERS

Through a partnership with We Energies, the MREA is able to offer short, low-cost, seminars for consumers to learn about the basics of renewable energy systems. The three hour seminar includes handouts, lecture, and a question and answer period. There are no prerequisites. Pre-registration is recommended.
